AUDREY II

ALL-IN-ONE TOUCH SCREEN POS

Ultra-slim Bezel and Optically Bonded Display

Based on the same elegant design, but with a slimmer bezel (only 7 mm), Audrey II looks even more appealing than its predecessor. The 15.6-inch on-cell touch display is optically bonded and uses anti-glare glass, which results in a brighter display with better touch precision. It supports up to three displays, including the main display, customer display and digital signage.

Blazing Speed & Performance

Powered by Intel's 11th generation "Tiger Lake" processor, M.2 PCIe solid-state drive and DDR4 RAM memory, Audrey II has the capacity to run the most data intensive POS applications.

POS Ready with Many Interfaces

Audrey II offers even more interface options than the previous generation, including support for Type-C USB connectors and the EX-300 expansion box provides even more options.

Customize With Peripherals

Audrey II comes with a large selection of peripherals and mounting options. Customize your solution with payment terminal brackets, printer, customer display, barcode scanner, camera, etc.

Built to Last

Audrey II is spill-proof and the solid-state drive protects the unit from dust and makes it more resistant to shocks and vibrations. On top of all this, Audrey II is backed by a 5-year warranty.
